## **HOSPITAL COMMITTEES**

While on some rotations, residents are expected to attend hospital committee meetings, e.g., at Shands Hospital: the transfusion committee, and at the MRVAMC during the resident's elective in Clinical Pathology and Laboratory Management: Quality Improvement Committee (monthly), Transfusion Committee (quarterly), Ambulatory Care Committee (monthly), and the Infection Control Committee (monthly). Additionally, the opportunity to participate in various hospital committees may be requested from the Residency Training Committee, provided that the participation will not interfere with the resident's duties.
