

**POLICY FOR HISTOLOGY UTILIZATION AT SHANDS HOSPITAL:**

1. Each resident will BE allowed 100 recuts stained with H&E (or special studies equivalent in dollars) each year.
2. The Hospital will furnish one slide box capable of housing 100 slides to each resident and fellow each year.
4. In addition to the recuts, slides necessary for creating visual aids for presentation at medical meetings will be furnished. Ordinarily, photographs can be taken from "routine" preparations and recuts need not be made. Special studies, e.g. immunohistochemical reactions, may be necessary for presentation of cases. Any requests for medical meetings must be countersigned by Dr. Wilkinson.
5. Any recut or special study that the Pathology Faculty believes necessary for your education and that is not billable for patient care must be requested by the Faculty so that it will not be counted against resident=s educations credits.
