

# CURRICULUM VITAE

## Personal Information:

Name: Zhiwei Xu, Ph.D.

China citizen and U.S. Permanent Resident (Green card) since 2005

## Address and Telephone Numbers:

Dept. of pathology, immunology and laboratory medicine

College of Medicine, University of Florida,

D6-6, Dental building

1600 Archer Rd, Gainesville, Florida, FL32610-0275.

(352) 392-2676 (Lab); (352) 294-5291 (O)

## Education:

1982,7-1985,7 Jining Medical College (Shandong).

1990,7-1993,7 Beijing Medical University (Beijing).  
Master in Immunology.

1997,7-2000,7 Peking University (Beijing).  
Ph.D. in Immunology.

## Academic Positions/Employment:

1985 - 1990 Technician at Medical Laboratory of Yanzhou Coal Hospital.

1993 - 1997 Lecturer at Dept. of Immunology in Weifang Medical College.

2000 - 2002 Lecturer at Dept. of Immunology in Weifang Medical College.

2002 - 2009 Postdoctoral Associate, Department of Pathology, Immunology, and Laboratory  
Medicine, College of Medicine University of Florida.

2009-present Assistant Professor, Department of Pathology, Immunology, and  
Laboratory Medicine, College of Medicine University of Florida.

## Awards and Scholarship:

1999, excellent Ph.D student scholarship of Peking University

2001, medal of Weifang outstanding scientist.

## Professional Societies

Membership of America Association of Immunologist, 2005-present

## **Publications:**

### Peer-reviewed articles:

## Grant supports

### Ongoing grants

1, NIH/NIAMS K01 AR056725-01A1 09/08/2009 to 07/31/2014

Title: Genetic and Functional Analysis of IL-2 Deficiency in Lupus-Prone Mice

Role: PI

This project aims at elucidating the genetic and cellular mechanisms of IL-2 deficiency in lupus model and its contribution to autoimmune disease development.

Total cost: \$538,556.00 including 8% indirect cost.

## Completed grants

- 1, NIH/NIAID R01-A058150-01                      Morel, L. (PI)                      07/01/04 to 06/30/09  
Title: B cell Developmental defect in murine lupus.  
This project proposes to define the mechanisms of B cell developmental defects in the NZM2410 model, specifically regarding B-1a and plasma cells, and to define the role of these defects in lupus pathogenesis.  
Role: CO-PI  
Total cost: \$1,250,000.00
- 2, Experimental Pathology innovative grants (EPIG), University of Florida College of medicine.10/01/2008 to 06/30/2009.  
Role: PI  
Title: Functional analysis of murine *Sle2c2* sublocus in experimental autoimmune models.  
This project is to explore if three different experimental autoimmune disease models can be induced in B6.*Sle2c2* congenic mouse, which will provides insights into the mechanisms of *Sle2c2* sublocus suppressing autoimmunity.  
Total cost: \$5,000.00
- 3, Experimental Pathology innovative grants (EPIG), University of Florida College of medicine.10/01/2009 to 06/30/2010  
Title: Characterization of a new lymphoma model in the *Sle2c1.lpr* mouse  
Role: PI  
The objective of this research is to define the property of enlarged lymph organs in *Sle2c1.lpr* Mouse, tomur characterization or only cell hyperproliferation.  
Total cost: \$4,000.00
- 4, Experimental Pathology innovative grants (EPIG), University of Florida College of medicine.10/01/2010 to 06/30/2011  
Title: Transcriptional regulation and IL-2 deficiency in lupus-prone B6. (278-37)rec1 Mouse.  
The objective of this research is to investigate the pssoible mechanisms of (278-37) Sublocus resulting in IL-2 production decrease by activated CD4+ T cells.  
Total cost: \$2,700.00
